

Math 53 Symmetry and Tiling

Linda Green

December 20, 2015

Table of Contents, First Half

1. Types of Symmetry
2. Isometries of the Plane
3. Reflections of Refelctions
4. Four (or Five) Types of Isometries
5. Combining Isometries
6. Order, Inverses, and Commutativity
7. Kaleidoscopes
8. Rosettes
9. Finite Figures
10. Frieze Patterns
11. Classifying Frieze Patterns
12. Paper Cutting and Musical Frieze Patterns
13. Wallpaper Patterns
14. Orbifold Notation and the Magic Theorem
15. Drawing Wallpaper Patterns

Table of Contents, Second Half

16. Topology
17. Classification of Surfaces
18. Euler Characteristic
19. Euler Characteristic and Topology
20. Curvature
21. The Gauss-Bonnet Theorem
22. Orbifolds
23. Orbifolds and the Magic Theorem
24. Spherical Symmetry Patterns
25. Frieze Pattern Notation
26. Hyperbolic Geometry
27. Hyperbolic Wallpaper Patterns
28. Tilings
29. Pentagonal Tiles
30. Penrose Tiles
